SAMPLE ONLY - Custom Printed Packaging Tape - 50mm x 66m - MOQ 576 Rolls High Volume Custom Branded Tape Mailing Packaging Print (144 Rolls per Box)

£0.00

Product Description

Sample only - sample of existing custom printed packaging tape will be sent for sample purposes only

- ***Production is specifically set up for high volume bulk prints at 4 packs minimum (576 rolls) as reflected by the low unit price. If your looking for low volume / one off orders we may not be able to provide an economical solution for you as we are specifically set up for high volume repeat long term packaging supplies due to the nature of our operation. Yes other suppliers can do 72 rolls but they are charging 5-10 per roll which is not economically viable for most. We are 1 to 60 pence per roll due to the economies of scale.***
- Stand out from the crowd and make a great first impression with your very own branded packaging tape.
- 7 base colours (background) to choose from: white, yellow, blue, red, green, clear or black*
- 1,2 or 3 colour logo / text print, options - print any logo text or other details according to your own supplied design on this polypropylene tape
- Solvent-free adhesive, this tape is ideal for general mail packaging suitable for e-commerce, stores, retailers or other.
- 50mm wide tape x 66m. 144 Rolls per Box.
- Contact us for 25mm wide and 75mm quotes.
- For artwork please upload in vector file (.eps, vectored PDF or Illustrator .ai file). We recommend using the PANTONE

colour system to ensure high-quality, vibrant and accurate colour printing

Artwork

In order to accurately reproduce your print, its very important we have the artwork in the correct format. Usually we will request a vector file (.eps, vectored PDF or Illustrator .ai file).

For most products: .eps , .pdf, .ai vector formats please. These formats are suitable for all types of print as long as they are vectored. Please note its likely any tinted areas of your artwork will be converted to a solid colour during the production process.

*DISCLAIMER: Remember, we are printing your artwork or logo onto a pre-manufactured product on an uneven surface in full colour which is an extremely difficult and challenging process. Whilst every care will be taken to give you the best results, there may be some slight imperfections or very slight colour variances depending on the artwork style and format. For best results please avoid large areas of block colour as this can give inconsistent print quality.
