~~£18.50~~ **£10.99**

Product Description

TO ORDER A SAMPLE OF THIS ITEM - CLICK HERE

LOOKING TO PURCHASE BY THE SQUARE METER - CLICK HERE IF YOU KNOW THE NUMBER OF SQUARE METRES YOU REQUIRE INSTEAD.

A double sided reversible hollow composite grey board with a low risk of slip groove surface on both sides (5mm grooves one face / 17mm grooves on the reverse), and non-non stain, complete with concealed hidden fixings for a barefoot friendly surface (Barefoot-friendly; slip & splinter resistant) looking contemporary and easy to install / clean as well as considerably longer lasting, low/no maintenance alternative to traditional timber decking (no need to stain or seal) & Mould / moisture resistant

Board Length: 3000mm

Board Width: 140mm Lined Grooved / 146mm Wood Grain Effect

Board Thickness: 25mm

Each board weighs approximately 8.1kg - Price is per board

Fixing joist center span: (400mm / 90" recommended max)

Material: Polyethelyne

Fire classification of construction products: BS EN 13501-1 Class B

Premium secret hidden concealed stainless steel fixing clips sold separately for a barefoot friendly surface (not cheap plastic ones which rust, crack, move, with stainless steel concealed hidden decking board fixing clips require 4mm - 4.5mm screw sold separately) - add on below - we recommend 20 per square m (8 per board)

Approx 2.3 Boards is 1 sq m. **This is APPROX**

Each 3m board covers 0.42 sq m.

You need 7.2 linear metres to cover 1 single square m.

1 Square m requires to x 2.5 boards approx.

Simply multiply the number of square m you require by 2.5, So if you require a composite plastic decked terrace area to cover 3m x 3m = 9 sq m 2.5 = 22.5 boards in total.* We always recommend adding on 10% extra for cuts/wastage etc. so, in this case, would recommend 25 boards as we can't be held liable for shortages in ordering/extra delivery charges or variations in colour from batch to batch due to the manufacturing process. Specification subject to change without prior notice, please check before ordering.

Note: To allow for expansion and maintenance, please be sure to keep a 30mm expansion gaps between all sides of your deck and any obstructions such as walls, fences, etc.

NOTE: due to manufacturing tolerances with regards to batch variation, we recommend ordering all material for a project at the same time, from the same batch as we cannot be held responsible for any variation that occurs between batches.

NOTE: Composite materials are made from 65% recycled hardwood, making this a natural product. As these are produced in batches, there may be slight colour tonal variation between boards therefore we advise purchasing all of the boards you need at the same time. We also recommend laying the boards out prior to installation in order to identify and create a subtle blend of any lighter or darker tonal variances
